SURFACE TECHNOLOGY

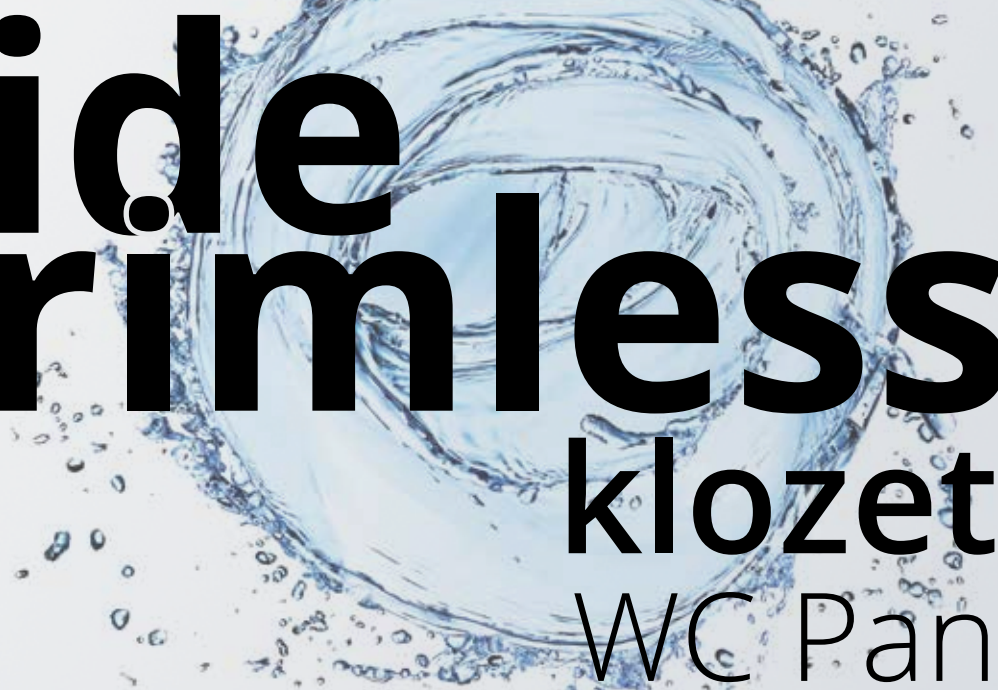

21. yüzyılın ciddi bir problemi olan enfeksiyon kapma riskine karşı geliştirilen antibakteriyel özellik taşıyan ürünler bulaşıcı hastalıklardan korunmak adına bilinçli tüketicilerin tercih sebebi oluyor. Özellikle toplu yaşam alanlarında ortak kullanım alanı olan tuvaletlerin hijyenik olmayışı sebebiyle difteri, hepatit A- B, idrar yolu enfeksiyonu, grip ve benzeri bulaşıcı hastalıklara maruz kalmamak adına, antibakteriyel ürünlerin kullanılması sağlık açısından büyük önem teşkil ediyor. Antibakteriyel özellikli ürünler bakteri oluşumu ve gelişimine engel olduğu için ömür boyu koruma sağlıyor. Yüksek hijyenik özelliği sayesinde kolayca bulaşabilen hastalıklara karşı etkili olan antibakteriyel ürünler, bakteri oluşumuna izin vermiyor. Uygun ortam bulduklarında kolayca üreyip, gelişebilen bakteriler önlem alınmadığı takdirde tedavisi güç olan pek çok hastalığın kaynağı... Antibakteriyel ürünlerin tercih edilmesi, bulaşıcı hastalıklara yakalanma riskini en aza indiriyor. İdevit Seramik'in antibakteriyel sır ile sırlanarak geliştirdiği ürünleri kalıcı hijyen imkânı sunuyor. Ayrıca kimyasal temizlik malzemelerine ihtiyaç duymadan çok daha az su ile kolayca temizlenebilme özelliği sayesinde yüksek oranda su ve enerji tasarrufu sağlıyor. İdevit Seramik, doğal dengenin korunması bilinciyle tasarladığı antibakteriyel ürünleri sayesinde, tüketicileri doğa dostu teknolojilerle buluşturuyor.

Against the risk of serious infection problem of the 21st century, developed products with antibacterial features are the reason why conscious consumers prefer to be protected from infectious diseases.

The use of antibacterial products is of great importance for health, especially in public areas due to lack of hygienic toilet with common places, Diphtheria, Hepatitis A- B, urinary tract infection, influenza etc.

Antibacterial products that provide lifetime protection to prevent bacteria growth, due to its high hygienic and antibacterial products, which are effective against easily infectious diseases, do not allow the formation of bacteria.

It is easy to breed when they find a suitable environment and the bacteria that develop are the source of many diseases that can not be cured if measures are not taken. Therefore, the preference of antibacterial products lowers the risk of getting infectious diseases. The products developed by İdevit Ceramic with antibacterial glaze provide permanent hygiene. It also provides high water and energy savings thanks to its ability to be easily cleaned with much less water without the need for chemical cleaning materials.

A dynamic splash of water in shades of blue and white, centered on the page. The water is captured in mid-air, creating a circular vortex with many small droplets and bubbles radiating outwards.

**ide  
rimless**  
klozet  
WC Pan

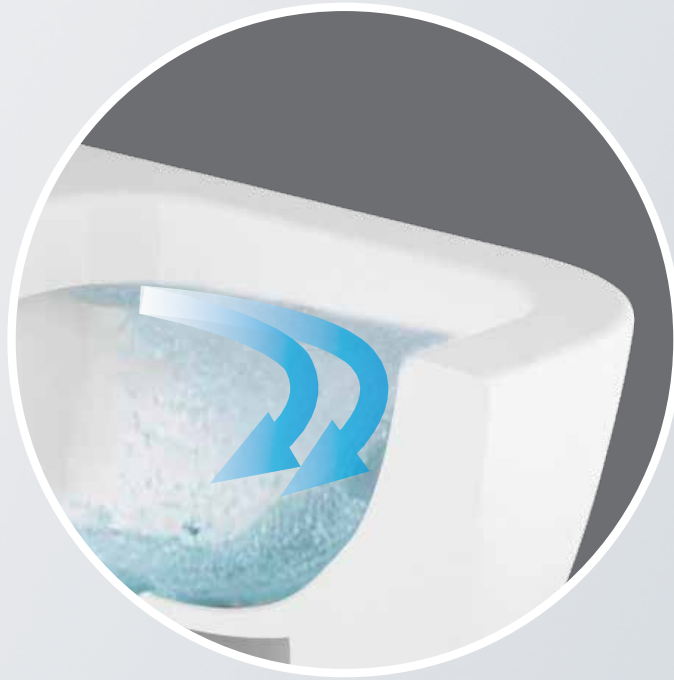

Geliřtirdiđimiz kanalsız hazne tasarımıyla yeni nesil İderimless klozetler, standart klozetlere göre kir ve tortu tutmayan, kolay temizlenen daha hijyenik ve estetik kullanım sunuyor.

The new generation rimless wc pan developed by İdevit provides dirt-free and sediment-free, easy cleaning, more hygiene and esthetic using, compared to standart wc pans.

Kanalsız oluđu ile

# easy clean

kolay temizlenen yüzeyler

## easy clean surfaces

**Pürüzsüz yüzey  
teknolojisi ile  
ürettiğimiz ürünler,  
kolay temizlenmesi  
sayesinde  
kir tutmayan ferah  
banyolar sunuyor.**

**Su ve deterjan  
tasarrufu ile,  
hem çevrenize  
hemde bütçenize  
katkıda sağlıyor.**

Our products  
which are produced  
as rubbed  
surface under  
high technology  
present easy clean  
and fresh  
bathrooms and  
control water flow,  
so we make  
economic contribution  
to your budget.

**Sert fırça ve kimyasal içeren deterjan kullanımına son!**

Stop using the hard brush and chemical that contains detergent.

**Easy clean teknolojisi sayesinde zahmetsiz kolay temizlik.**

Thanks to easy clean technology for providing effortless easy cleaning.

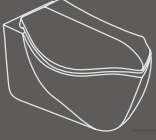

Banyonuzun hijyeni, ev halkının sağlığı için son derece önemlidir. Güvenilir ve hijyenik bir banyo için geliştirdiğimiz easy clean yüzey teknolojisi sayesinde özel sırla üretilen ürünlerimiz, kullandıkları süre boyunca, ekstra hijyenle bakterilerin üremesini engeller. Bu işlem için yüzeye uygulanan malzeme aşındırıcı kimyasal deterjanlar, kuvvetli asit-bazlar veya sert cisimler ile (fırça, keçeli süngerler vb.) temizleme yapılmadığı sürece özelliğini uzun yıllar sürdürebilir. Yüzey kendiliğinden kolayca temizlenme özelliğine sahip olduğu için bu tarz temizleme işlemlerine ihtiyaç duyulmamaktadır. Kolay temizlenebilir özelliği sağlayan hidrofobik su itici ince ve görünmez film tabakası, bakterilerin yüzeye tutunma özelliklerini azaltarak yüzeyin hijyenik kalmasını sağlar. Temizliğe gerek duyulması halinde, yumuşak bir bez ve aşındırıcı özelliği olmayan bir sabun ile temizlik gerçekleştirilebilir.

Your bathroom hygiene is vital for your household health. For this reason, by means of the easy clean surface technology we developed for a more safe and hygienic bathroom, our specially glazed products, with the help of extra hygiene, will prevent bacterial growth during the time they are used. With this process, the material applied on the surface can maintain its feature unless abrasive chemical detergents, strong acid-bases or hard objects (such as brush, felted sponges) are applied for cleaning. Because the surface has the feature to be easily clean itself, it does not require these kind of cleaning processes. If it's much required, cleaning may be made with a soft cloth and a non-abrasive soap. Thin and invisible hydrophobic water-repellent film layer providing the easy-cleaning feature, reduces the bacterial hold characteristic of the surface and ensures the surface is kept hygienic.

# Vega

*İlhamını gökyüzünün en parlak yıldızı Vega'dan alan seri, kusursuz formu ve ışıltısıyla göz kamaştırıyor. Güneşe en yakın yıldız olan Vega'nın sıcaklığıyla banyolarınızda yaşam bulan seri, modern hatlarıyla sade ve kusursuz... Keskin ve net hatlara sahip güçlü görüntüsüyle dikkat çekiyor. Renk seçeneklerinin arasında siyahın büyüsunü tasarımında barındıran seri, yıllara meydan okuyor. Klozete entegre edilen ankastre taharet musluğu ile temizlik artık daha kolay.*

*Taking inspiration from the brightest star of the sky Vega the series is glaring with its perfect form and glitter. With the warmth of Vega, the closest star to Sun the series comes to life in your bathrooms with its modern, simple and perfect lines... Having sharp and distinct lines the series is standing out with its strong look. Having the magic of black among its' color options the series is defying the years. With the build-in bidet nozzle integrated into the closet the cleaning is easier now. The drain connection is universal and suitable for waste water outlet both from the bottom and back of the closet.*

# Yeni nesil OSMANLI TAŞI

kanalsız, hijyen, ergonomik,  
taharet musluklu hela taşı

Bilim adamları insan vücudunun çömelerek ihtiyacını gidermek üzere dizayn edildiği konusunda hem fikir. Yapılan bilimsel çalışmalar, daha rahat ve tam boşaltımın, hemoroit, kabızlık, bağırsak kanseri, sindirim hastalıkları ve rahim düşüklüğü gibi birçok rahatsızlığa engel olması konusunda ortak görüş bildiriyor. Yaratılışımız gereği, boşaltım sistemimiz sadece 35° açı yakalandığı zaman tam olarak doğru çalışıyor. Bu açının tam oluşmaması durumunda tam ve doğru boşaltım sağlanamıyor.

Bu bilimsel analizin çıkış noktasıyla üretilen Hela Taşı, ergonomik yapısı ile sağlıklı bir boşaltım imkanı sunuyor.

Kanalsız hazne tasarımı ve antibakteriyel özelliğiyle de maksimum seviyede hijyen sağlayan ürünün ön bölümünde yer alan yükselti sayesinde, pis su ve idrarın sıçraması engelleniyor. Muhafazakar ve geleneksel yaşam tarzını benimseyen ailelerin özellikle tercihi olan Ergonomik Hela taşı Serisi, bel ve bacak ağrısı çekenler için de ideal bir tasarım. Üründe ayakların zemine temas ettiği bölge 13°'lik bir açıyla desteklenerek, doğru oturma biçimi kendiliğinden sağlanıyor. Standart hela taşlarının aksine bu üründe hela taşına entegre edilen taharet musluğu sayesinde kolay temizlik imkanı mümkün.

Temizlik sırasında suyun akış hızının ayarlanabilir özellikte oluşu ise daha konforlu bir kullanım kolaylığı sunuyor.

New generation

# OTTOMAN SQUATTING PAN

rimless, hygienic, ergonomic,  
integrated faucet squatting pan

Scientists agree that the human body is designed to squat for defecating. Scientific studies have made a consensus on the need for more comfortable and complete elimination of many illnesses such as hemorrhoids, constipation, bowel cancer, digestive disorders and low uterine activity.

For our creation, our discharge system works exactly when it only captures an angle of 35°. If this angle does not occur completely, accurate evacuation is not achieved.

Squatting produced with the starting point of this scientific analysis, offers a healthy discharge with its ergonomic structure.

It also provides maximum level of hygiene with its rimless design and antibacterial feature.

The ridge that in front of the product, prevents the splash of water and urine.

The Ergonomic Ottoman Squatting Pan series, which is especially preferred for families who adapt a conservative and traditional lifestyle, is also an ideal design for those with back and leg pain.

The area where the feet touch the floor is supported by an angle of 13° so that the correct seating is achieved automatically.

This design with faucet helps easier cleaning compared to standart squatting pans.

Water flow rate can be adjusted during cleaning and provide more comfortable to use.
